CONTENTS

Special Issue in Memory of Professor Sumiyasu Yamamoto
Experimental Design and Related Combinatorics

Edited by Sanpei Kageyama and Teruhiro Shirakura

Volume 106, Numbers 1–2

Foreword 1

Preface *S. Kageyama and T. Shirakura* 3

A census of $t-(t+8,t+2,4)$ designs, $2 \leqslant t \leqslant 4$ *P.C. Denny and R. Mathon* 5

The completely symmetric designs with blocksize three *J.P. Morgan and S.K. Srivastav* 21

Symmetry of a group divisible design with $r=\lambda_1+1$ *T. Shimata and S. Kageyama* 31

Some series of rectangular designs *K. Sinha, M.K. Singh, S. Kageyama and R.S. Singh* 39

Constructions of balanced incomplete block designs with nested rows and columns *T. Hishida and M. Jimbo* 47

Balanced nested designs and balanced n-ary designs *R. Fuji-Hara, S. Kuriki, Y. Miao and S. Shinohara* 57

The metamorphosis of λ-fold block designs with block size four into λ-fold triple systems *C.C. Lindner and A. Rosa* 69

Block disjoint difference families for Steiner triple systems: $v \equiv 3 \bmod 6$ *J.H. Dinitz and N. Shalaby* 77

Complete sets of disjoint difference families and their applications *R. Fuji-Hara, Y. Miao and S. Shinohara* 87

Cyclic Mendelsohn triple systems with a cyclic resolution or a cyclic almost resolution *M. Mishima* 105

Frames with block size four and index three *S. Furino, S. Kageyama, A.C.H. Ling, Y. Miao and J. Yin* 117

An incomplete split-block design generated by GDPBIBD(2)s *F. Hering and S. Mejza* 125

Optimality and constructions of incomplete split-block designs *K. Ozawa, M. Jimbo, S. Kageyama and S. Mejza* 135

Weighted A-optimal block designs for comparing test treatments with controls with unequal precision *V.K. Gupta, D.V.V. Ramana and R. Parsad* 159

Finding optimal designs in the presence of trends *D. Majumdar and R.J. Martin* 177

On the determination and construction of A- and MV-optimal block designs for comparing a set of test treatments to a set of standard treatments *M. Jacroux* 191

On an optimal design for an isotonic inference *C. Hirotsu* 205

Optimal allocation of patients in titration to fixed dose trials *S. Gupta, B. Hosmane, M. Singh and R. Singh* 215

On exact tests of linear hypothesis in linear models with nested error structure *S.-G. Wang and W. Ma* 225

A bound for efficiency in multiple response designs *A.M. Dean, W.I. Notz and L.-J. Kao* 235

An annotated bibliography of application papers using certain classes of fractional factorial and related designs *T. Prvan and D.J. Street* 245

Norm of alias matrices for balanced fractional 2^m factorial designs when interesting factorial effects are not aliased with effects not of interest in estimation *M. Kuwada* 271

Further results on orthogonal array plus one run plans *F.S. Chai, R. Mukerjee and C.-y. Suen* 287

On the $(v,5,\lambda)$-family of Bhaskar Rao designs *G.R. Chaudhry, M. Greig and J. Seberry* 303

Necessary and sufficient conditions for three and four variable orthogonal designs in order 36 *S. Georgiou, C. Koukouvinos, M. Mitrouli and J. Seberry* 329

Holey Steiner pentagon systems and related designs *F.E. Bennett, G. Ge, H. Zhang and L. Zhu* 353

Strongly linear trend-free block designs and 1-factors of representative graphs *W.-C. Lin and J. Stufken* 375

Packing of K_v with certain graphs of five vertices *S. Zhang and J. Yin* 387

Enumeration of connected graphs with cut vertices *Y.-L. Jin, S. Tazawa and T. Shirakura* 409

Candelabra systems and designs *H. Mohácsy and D.K. Ray-Chaudhuri* 419

Repeated measurements designs for a model with self and simple mixed carryover effects *K. Afsarinejad and A.S. Hedayat* 449

Existence of $V(m,t)$ vectors *K. Chen and L. Zhu* 461

An extension of the product-parts replacement problem *Y. Fujikoshi, K. Futagami, J. Fukunaga and T. Hirata* 473

The nonexistence of ternary [97,6,63] codes *N. Hamada and T. Helleseth* 485

On relative prime number in a sequence of positive integers *M. Ohtomo and F. Tamari* 509

Author Index Volume 106 517
